Design Requirements Listed below are some of the items that need to be considered when designing a green roof. Further information can be found in the ALPAFLORE Avis Technique

September 2008 - Axter

Every design process is unique, and this generic step-by-step guide to the design process is indicative only. The number of steps varies depending on the complexity of the project and whether you're building a new home, renovating or simply making a few small home improvements.

The design process | YourHome

Passive design "Passive design" is design that takes advantage of the climate to maintain a comfortable temperature range in the home. Passive design reduces or eliminates the need for auxiliary heating or cooling, which accounts for about 40% (or much more in some climates) of energy use in the average Australian home.
